# How to use the Sunday school system

One guide for everyone who uses it: office staff, department leaders, attendance takers, teachers, and members using the Telegram bot or the member page. Pick your part below.

**Office administrator**
የፅህፈት ቤት አስተዳዳሪ
Everything, for every department

**Department administrator**
የአገልግሎት ክፍል አስተዳዳሪ
Runs one or more departments

**Attendance taker**
አቴንዳንስ ያዥ
Takes today's attendance

**Teacher**
መምህር
Assessments and marks

**Member · Telegram bot**
አባል · ቴሌግራም ቦት
Register and see your details

**Member · website**
አባል · ድረ ገጽ
See your details in a browser

---

ALL STAFF

## Signing in

ወደ ሲስተሙ መግባት

Staff accounts are created by the office, or by a department administrator for their own attendance takers and teachers. Nobody can create their own staff account.

1. Open **portal.fikureegzi4.com** in a browser on a phone or computer.
2. Type the email and password you were given, then press `ግባ` (Sign in).
3. On your first sign-in, open your name in the top corner, choose **My profile** (የእኔ መገለጫ) and change the password to one only you know.

### Things every user can do

- **Change the language.** The language switch in the top bar flips every screen between Amharic and English.
- **Change light or dark look.** The theme button sits beside the language switch.
- **See only what your role allows.** The menu on the left only shows the pages you can use. If a page you need is missing, ask the office to check your role.

- **Read dates in the Ethiopian calendar.** Every date in the system and the bot is shown and typed in the Ethiopian calendar (ዓ.ም).

**Keep your password to yourself.**

Every change in the system is recorded with the name of the person who made it. Sign out with **your name → Sign out** on shared computers.

ROLE GUIDE

# Office administrator

የፅህፈት ቤት አስተዳዳሪ

The office sees and manages everything, across every department. It is the only role that registers and edits member records, changes office-wide settings, and creates department administrators.

All departments · All pages

## Register a new member

1. Go to **Members** (አባላት) and press `Register member`.
2. Fill the sections: personal details, contact and address, education and work, emergency contact, and health. Only the first name, father's name, gender, date of birth and joining date are required. Add the phone number too, because the member needs it to use the bot and the member page.
3. Under **Classes** (ክፍሎች), choose the level the member is in for each class they attend.
4. If a chosen class has an agreement (for example the Mezmur Class), an agreement switch appears. Turn it on only after the member has read and accepted the rules.
5. Save. The member gets a member ID such as `FE-00042`, which is also their QR code.

**Many members at once**

The members list also has an Excel import. Download the template, fill it, upload it, fix any rows the check flags, then create them all in one go.

## Keep member records up to date

- Open a member from the list to see everything about them: details, classes, departments, attendance, courses and exams. Press `Edit` to change their record or photo.
- Use the filters on the members list to narrow by class, department, status or how they registered. Choose **Registered via → Self-registered (bot)** to review people who registered themselves.

- Mark someone **Inactive** instead of deleting them when they stop coming, so their history is kept.

### Print QR membership cards

On the members list, press `Print QR codes` to print A4 sheets of QR codes, 20 per page, with the name and member ID under each. It prints every member that matches the list's current filters, so filter first. On a member's own page, `Print QR` prints just theirs.

### Classes and their agreements

Under **Classes** (ክፍሎች), each class (for example the Mezmur Class) has levels. To give a class rules that members must accept, open the class menu and choose **Add agreement**, then write one rule per line. The agreement then appears both in the member form and at the end of bot registration for anyone who picks that class.

### Departments

- **Departments** (የአገልግሎት ክፍሎች) shows the nine main departments and their sub-departments. Switch between **Cards** and **Tree** to see the whole structure at once; the tree has a search box.
- Open a department to see its roster. Add members to it and set their role: Head (ሰብሳቢ), Deputy (ምክትል), Secretary (ጸሐፊ) or Member.
- **Service groups** organises members into groups per service term.

### Staff accounts

1. Go to **Users** (ተጠቃሚዎች) and press `New user`.
2. Choose the role. For every role except Office administrator, also choose the department or departments the person works in. They automatically get the sub-departments under them too.
3. Give the person their email and starting password and ask them to change it.

### Turn bot self-registration on or off

Go to **Settings** (ማስተካከያዎች) and under **Self-registration** switch on **Let newcomers register themselves**. While it is on, anyone whose phone number is not yet on a member

record can register themselves through the Telegram bot. Turn it off after a registration drive; the change takes effect within a few seconds.

### Everything else

The office can also do everything described for department administrators below (attendance, courses, exams, assets), for every department. The **Audit log** (ኦዲት) shows who changed what and when.

ROLE GUIDE

# Department administrator

የአገልግሎት ክፍል አስተዳዳሪ

A department administrator runs their own department or departments, including every sub-department under them. They see members of their departments but cannot register or edit member records; ask the office for that.

Own departments and sub-departments | Cannot edit member records

## Your department's people

- Open **Departments**, then your department, to add members to its roster and set their roles.
- Open any of your members to see their details, attendance, courses and exams.
- Organise **Service groups** and manage the **Classes** your department runs.

## Attendance

1. Go to **Attendance** (አቴንዳንስ) and press `New session`.
2. Choose what it is for: a class level, a service group, or another gathering such as a meeting. The roster fills itself from that choice.
3. Set the date and start time. People who check in more than 15 minutes after the start are marked Late automatically; you can change the minutes.
4. Take attendance by scanning QR codes or tapping each person's status. When it is over, press `Close session`. Press `Reopen` later if you need to fix a mistake.

Unlike attendance takers, department administrators can create and change sessions for past or future days. **Attendance → Reports** shows who comes most and who has dropped below a chosen rate, so you know whom to follow up.

## Courses

Under **Courses** (ኮርሶች), register a course, schedule a run (a round of the course with dates), add the students and assign the teachers. Teachers then set up the assessments and enter marks; you can do the same.

## Exams

Exams are department tests that are not part of a course, for example the St. John's Wereb assessment of the Mezmur Class. Each exam belongs to a class, optionally to one level of it.

1. Go to **Exams** (ፈተናዎች), press `New exam`, choose the class and, if it is only for one level, that level.
2. Add the parts and their weights. For example እንቅስቃሴ 40% and ዜማ 60%. The weights must add up to 100. The pass mark is 50 unless you change it.
3. Add candidates: a whole level or the whole class in one press, or individual members by searching their name or ID. Anyone who joins the class later can be added the same way.
4. Enter each person's marks on the mark sheet. Each part is marked out of its weight, so ዜማ is out of 60. A total and pass or fail appear once every part is marked.

## Assets

Under **Assets** (ንብረት), record what your department owns, with photos, so it can be found and counted.

## Your attendance takers and teachers

In **Users**, you can create accounts for attendance takers and teachers, only within your own departments. Only the office can create another department administrator.

ROLE GUIDE

# Attendance taker

አቴንዳንስ ያዥ

An attendance taker only sees the attendance page, and only today's sessions for their own departments.

Today only · Own departments

1. Sign in and open **Attendance**. Today's sessions for your departments are listed.
2. Open the session, or press **New session** if today's has not been created yet.
3. Press **Start camera** and let the camera read each member's QR code, from their printed card or from the bot on their phone. Each scan marks them Present, or Late if they arrive after the late time.
4. For anyone without a code, find their name on the roster and tap their status: Present (ተገኝቷል), Late (አርፍዷል), Absent (ቀርቷል) or Excused (ፈቃድ).
5. If the camera cannot read a card, type the member ID into the box under the camera and press **Record**.
6. When everyone has been marked, press **Close session**.

**Missed a day?**

Attendance takers cannot record yesterday's attendance. Ask your department administrator, who can.

ROLE GUIDE

# Teacher

መምህር

A teacher sees only the course runs they are assigned to teach.

1. Sign in and open **Courses**. Only your own runs are listed.
2. Open a run and set up its assessments, for example a mid-term and a final, with how much each counts.
3. Enter each student's marks. The total and pass or fail are worked out for you.

Your students can see their marks in the Telegram bot under `🎓 ኮርሶች`. As a member yourself, the same button in the bot also lists the runs you are teaching.

REFERENCE

# Who can do what

“Own” means the departments assigned to that person, plus every sub-department under them.

| TASK | OFFICE ADMIN | DEPARTMENT ADMIN | ATTENDANCE TAKER | TEACHER |
|---|---|---|---|---|
| Register and edit members | **Yes** | View own only | No | No |
| Department rosters | **All** | **Own** | No | No |
| Create and rename departments | **Yes** | No | No | No |
| Classes, levels, service groups | **All** | **Own** | No | No |
| Take attendance | **Any day** | **Any day, own** | **Today, own** | No |
| Attendance reports | **All** | **Own** | **Own sessions** | No |
| Courses and runs | **All** | **Own** | No | **Own runs** |
| Enter course marks | **Yes** | **Own** | No | **Own runs** |
| Exams and their marks | **All** | **Own classes** | No | No |
| Assets | **All** | **Own** | No | No |
| Create staff accounts | **Any role** | **Takers and teachers** | No | No |
| Audit log | **Yes** | **Yes** | No | No |
| Settings (bot self-registration) | **Yes** | No | No | No |

FOR MEMBERS

# The Telegram bot

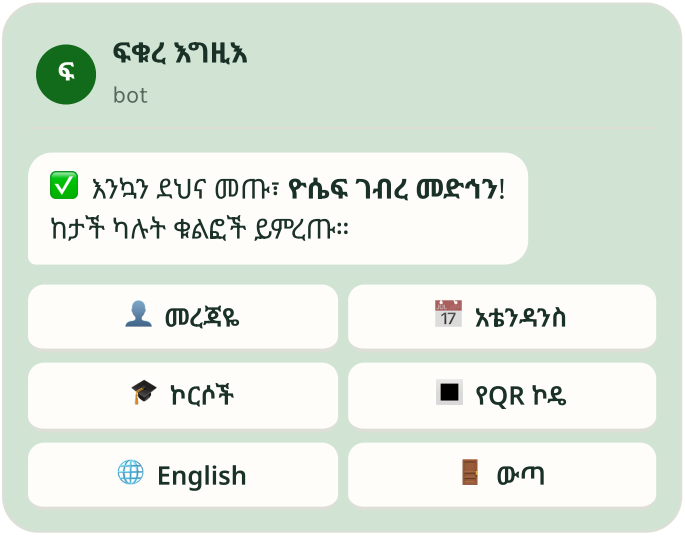

የቴሌግራም ቦት

The bot shows your membership details, attendance, courses and QR code on your phone. It speaks Amharic first; press `🌐 English` to switch.

## Connect your account

1. Open the Sunday school's bot in Telegram (the office shares the link) and press `Start`.
2. Press `📱 ስልክ ቁጥሬን አጋራ` (Share my phone number) and confirm. It must be your own number; a forwarded contact is refused.
3. If that number is on your member record, the bot greets you by name and shows the menu.
4. If several members share the number, such as parents and children, the bot asks whose details to show. Press `👥 አባል ቀይር` later to switch.

If the number is not on any record, the bot either offers to register you (when the office has opened registration) or asks you to contact the office.

The menu stays at the bottom of the chat. The names shown here are an example.

## What each button shows

| BUTTON | WHAT YOU GET |
| --- | --- |
| 👤 **መረጃዬ** My details | Your membership card: photo, member ID, Christian name, gender, date of birth, phone, status, the date you joined, your classes and levels, your departments and roles, and your service group. |
| 📅 **አቴንዳንስ** Attendance | The bot first asks which department. Pick one or 📋 **ሁሉም** (all). You see the last 90 days: how many times you were present, late, absent or excused, your attendance rate, and each session. |
| 🎓 **ኮርሶች** Courses | Each course you are in, whether it is upcoming, ongoing or finished, your marks and whether you passed. Teachers also see the runs they teach. |
| ◼ **የQR ኮዴ** My QR code | Your QR code. Show it to the attendance taker at check-in instead of a printed card. |
| 🌐 **English / አማርኛ** | Switches the bot's language. |
| 🚪 **ውጣ** Sign out | Disconnects this Telegram account. Share your number again to come back. |

FOR NEW MEMBERS

# Registering yourself in the bot

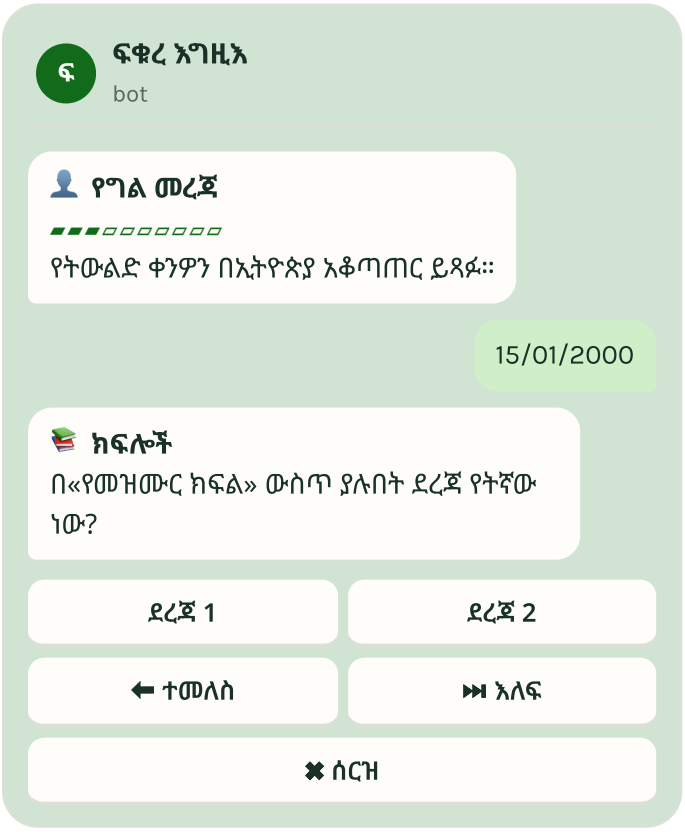

በቦቱ ራስን መመዝገብ

This works only while the office has turned on self-registration. It takes about five minutes, and the bot asks for everything the office would.

1. Start the bot and share your phone number. If it is not on any record, the bot shows what it will ask. Press `📝 ልመዝገብ` (Register me).
2. Answer one question at a time. Type your answer or press a button. A bar at the top shows how far along you are.
3. At the end, the bot shows everything you entered. If it is all correct, press `✅ ይመዝገብ`.
4. You receive your member ID, for example `FE-02015`. The menu appears and you can use the bot straight away.

### Buttons that are always there

- `⬅ ተመለስ` goes back one question to fix an answer.
- `⏭ እለፍ` skips a question you do not have an answer for.
- `✖ ሰርዝ` cancels the registration. Nothing is saved.
- `🔁 እንደገና ልሙላ`, on the final summary, starts the answers over.

The level names shown here are an example; the bot lists each class's real levels.

## What the bot asks, in order

👤 የግል መረጃ · 📚 ክፍሎች · ⛪ የአገልግሎት ክፍሎች · 📞 የመገናኛ መረጃ · 🏠 አድራሻ · 🎓 ትምህርትና ሥራ · 🆘 የአደጋ ጊዜ ተጠሪ · 🩺 ጤና · 📷 ፎቶ · 📜 ስምምነት

- **Personal details:** your name, father's and grandfather's name, Christian name, gender, date of birth, place of birth, marital status and spiritual father.
- **Classes:** for each class, the level you are in. Press `⏭ እለፍ` for classes you do not attend.
- **Service departments:** tap every department you serve in. Each tap toggles a tick (✅). Press `✔ ጨርሻለሁ` when you are done, or straight away if you do not serve anywhere yet.
- **Contact and address:** a second phone number, email, city, sub-city, woreda, kebele and house number.
- **Education and work, emergency contact:** your education level, occupation, and a person to call in an emergency with their relationship to you and phone number.
- **Health:** whether you have a condition that needs attention. If yes, describe it in a few words, for example asthma or diabetes.
- **Photo:** send a clear photo of your face, under 2 MB, or skip it.
- **Agreement:** only for classes that have one, such as the Mezmur Class. Read the rules and press `✅ አንብቤ ተስማምቻለሁ`. If you do not agree, press the `🚫 … አልቀላቀልም` button; you are registered without that class.

**Typing dates and numbers**

Write dates in the Ethiopian calendar as day/month/year, for example `15/01/2000`. Write phone numbers as 10 digits starting with 09 or 07, for example `0911223344`.

FOR MEMBERS

# Your member page on the web

የአባል ገጽ

Members without Telegram can see the same details in any browser. No password is needed.

1. Open **portal.fikureegzi4.com/portal**.
2. Type your member ID, for example `FE–00042`, or press **Scan my QR code** and hold your card to the camera.
3. Type the phone number on your membership record, then press **Show my details**.

The page shows your photo, member ID and a QR code to show at check-in; your personal and contact details; your classes and levels; your departments, roles and service group; your courses and marks; and your attendance, with a period you can change.

**Wrong details?**

Members cannot change their own record. If anything is wrong or out of date, tell the office and they will correct it.

HELP

# Common questions

**The bot says my number is not in the records.**

Your phone number must be on your member record exactly. Ask the office to check or add it, then share your number in the bot again. If registration is open, the bot instead offers to register you.

**The bot says self-registration is closed.**

The office has switched it off. Register at the office, or wait for the next registration drive.

**Two of us use the same phone.**

Register both members with that number. The bot asks whose details to show, and `👥 አባል ቀይር` switches between them.

**The member page says the ID and phone do not match.**

Check the ID and that you typed the number on your record. After several wrong tries it asks you to wait a few minutes before trying again.

**A staff page I need is missing from my menu.**

Your role does not include it, or you are not assigned to that department. Ask the office to check your account in Users.

**An attendance mark is wrong.**

Open the session and tap the right status. If the session is closed, reopen it first. Attendance takers can only change today's sessions; for earlier days, ask a department administrator.

**A self-registered member's details look wrong.**

The office opens the member and edits the record. Use the **Registered via → Self-registered (bot)** filter to review everyone who registered themselves.
